SERVING THE WORLD'S RAILWAYS

PowerU Annex

The Unipart Rail PowerU Annex provides an innovative and cost effective Class II retrofit solution to existing apparatus housings.

Adhering to all Network Rail product specifications, the PowerUAnnex is designed to ensure there is no requirement for civil works or additional concrete bases on site.

The PowerU Annex is a fully earth free Class II product designed to meet Network Rail 'Mechanical and Environmental Requirements for 650V External Power Annexes'. All internal components - FSP04 Switch Boxes, Terminal Boxes and Transformers are fully Network Rail approved.

Features

Flexible Fittings - The enclosure can be fitted with or without sliding gland plates and will support direct cable glanding or conduit protected cable.

A secure solution - The Annex enclosure has been fitted with incoming and outgoing gland plates as well as a 3 point locking enclosure with padlock eye.

SIN I I 9 compatible - SIN I I 9 Legacy upgrade compatible. Suitable to be included in Class II installations to NR/L2/ SIGELP/27410.

For more information on the PowerU Annex, speak to our team on 01904 544 020 or email enquiries@unipartrail.com
